MALACAÑAN PALACE

MANILA

Fuga Island is going to be developed by a group of American Businessmen who have been developing vacation resorts like the Bahamas and New Hebrides. They intend to spend \$150 million keeping Parit and Mabog as private preserves. But a city has to be created and the charter has to authorize the city board to license games of chance - gambling and an international airport has to be established or authorized.

I met the American group brought by Alfonso Sini of Taggit and they are eager to go into Fuga and develop it into a resort island.

The Japanese ambassador came to explain the problem of the African. He had brought the Japanese professors to Palawan. He had best Wednesday to apologize for the mauling they have caused.

I intend to ask them to help in the Philippine program of malarial research and control as well as in our program of schistosomiasis japonensis. A compound of sodium ~~antimony~~ ~~arsenic~~ ~~fluorine~~
