Opened the Association of Science of Asia at the NSDB. This is the formal organization of science started some time in 1970.

Then met some delegates - Velasco of Uctabato and Tony Raguza, Gen Manager Raguza of NPC, the Korean head of UNDP 3, and the Phil representative, Gen.

Harding. Our study program includes the Laguna as Bay Development and the feasibility study of an atomic generator is considered a model for developing countries.

We showed the movies of the Bengbuong II rocket launch on Mar. 12th at Caraballo Island to the cabinet.

And discussed the deficit (expected P.399 million) how to reduce it, how to update the provincial and city reporting and whether we can spend P.100 million for infrastructure this summer; what changes are required in the agricultural production program.

Project Sanyaganta which seeks the recombination of any substance in a solution of H₂O with the formula is formally launched. I talked to Dr. Rosa of 9-B Dalmeida St., Prop'd 3, Q.C. Tel + 989334 this morning.

The formula looks promising. It could mean all our mines are now high grade. It could mean we can now split the atom by means other than the usual.
