MALACANAN PALACE

MANILA

Bongbong was operated on successfully this morning 8:10 AM to 8:30 AM by Dr. Antonio Bautista - tonsillectomy. I called up at 10:30 AM and ~~the~~ Knudsen told me he was sleeping as though he had an aneurysm before that. Tonight he was suffering spasmodic pains.

Raining hard and signal by 2 is still up in Northern Luzon and not in Manila etc. I was not allowed to fly to Manila. Still raining up to now and I have planned to go back to Poro Point by 6:00 AM then fly to Manila by Pooker tomorrow.

I have to see Bongbong and work out the compromises on the calamity aid, the budget, public works bill, tax measures, PAB and fulfill the repair and rehabilitation plans. I flew by heli to Ilog-Ilog with Pooker. I have worked the mission orders for the heli. Met the British officers on the way to 4 to 5 - Lincoln. I attach reports. I also attach Chronicle story of NPAS in Can. Sun & News across today & today Bulletin.
