MALACAÑAN PALACE
MANILA

Tired out; so slept last night at 10:30 PM but woke up at 3:30 AM after five hours, then catnapped till 6:00 AM.

Imelda woke up and had bradycardia higher blood pressure of 120/80 when her regular blood pressure is 100/70. And she could not sleep. It turned out she had taken two cups of black coffee the night before and she does not take coffee.

So I directed the nurse to give her a tablet of

left by car at 6:45 AM on the car of the mayor which was all shot from the bad road. Arrived at San Fernando Airport at 8:30 AM. Helicoptered to Bued River with Sec. D. Consumji. Arrived at 9:30 after a 30 minute flight. Eng. Uvalde promised the barley bridge by tomorrow afternoon. They were still driving steel I-beams or piles with a pile driver with a crane.

Ordered the grouping of all engineer equipment and personnel to equi concentrate

on the projects by priority.
Helicoptered to Suigayan at 9:50 AM.
arrived 10:05 AM. Distributed palay seeds
as well as vegetable seeds. The tents were
too hot even with the flaps up.
Sec. E. A. Lim arrived from Iloilo

via Cebu by helicopter.

Left Suigayan at 11:30 AM. Arrived
at San Fernando at 12:00 AM. Inelda was
not yet there. Retired to the Poro Rest house
for lunch. Inelda arrived at about 1:30 PM.
We decided to stay so we could
see the beach house at Paratong (or Sta. Rita)
Agoo, Is Union. When I woke from my nap Inelda
had gone to San Fernando to start the inoculation
program. After looking around for a guide, to
the beach house, I took the helicopter for
Agoo. Col. Lopez knew the place. I landed
on the beach which is a fine wide although
black-sand or iron sand beach. Sent back
the helicopter to San Fernando at 6:00 PM
and I was going to wait for the family

at Cong. Jose Aguirre's house at the beach.
The beach house that Kvalde asked
to be built near Joe Aguirre's house is
supposed to be my ^{birth day} gift on Sept.
11th. It is a small ^{type} house of bamboo
walling. The madra casos posts that do not
rest on the ground but on cement foundations
are beginning to sprout leaves.

It is half finished, the rains having
stopped the work. But it looks charming
and comfortable.

Like the beach as it is wide. It is
about 100 meters of ^{level} clean sand from the
house to the water's edge. The water is
a meter high for a hundred yards out to
the sea. This may make it difficult for the
deep fuel boats to approach the beach.

Mayor Sergio Asuncion plane crashed in
Cebu and he suffered minor injuries.

The people in Baguio are still
wondering about the sun that we brought to
that city. ☀️ has been sunny the whole day even in
Baguio.
